Performance

See what our new PICO Caméléon tools can do for you!

PICO's Caméléon tools adapt to your working environment. Customize your tool, by replacing the die from our wide ranging collection of 16 dies. The easy change technology allows the dies to be changed rapidly without the need of any other tool. No need to buy a whole new tool each time you need another crimp. The Caméléon crimper adapts perfectly to the job you need it to perform.

ADAPT TO YOUR CRIMP!

Caméléon Tool Bodies

The Caméléon ratchet crimp tool body consists of a sturdy carbon steel frame, adjustable compression wheel and rubberized handles for a comfortable grip. The crimper eliminates the problem of over and under crimping connectors. The ratchet action and quickrelease ensure that crimps are secure and uniform. The built-in safety release allows the tool to release mid crimp if required. The consistent and replicable pressure make this the ideal tool for CSA approved connectors. The 10" tool body gives better leverage to crimp heavy duty connectors.

The Caméléon crimper adapts perfectly with any PICO Caméléon dies. The easy change technology allows the dies to be changed rapidly without the need of any other tool.
